MONDAY LUNCHEON SPEAKER

Allen Gilmer, Co-Founder, Drillinginfo
North American Opportunities at \$30 Oil

Prior to co-founding Drillinginfo in 1999, Allen was an independent oilman for seven years, co-founding three profitable E&P companies. He began his oil patch career with Marathon Oil Corporation, as a geophysicist working in Research, Seismic Acquisitions, and South American exploration. Allen is active in all aspects of Drillinginfo's new product development and is widely recognized for his industry leadership and vision. He holds several patents in the field of multi-component seismology. He received his BA in Geology from Rice University and his MS in Geology from University of Texas at El Paso.

TUESDAY LUNCHEON SPEAKER

Dr. Mark A. Schwartz, President and Managing Director, Scenario Planning, PIRA Energy Group
Crude Oil Prices – Structural Recovery Underway

Dr. Mark A. Schwartz works closely with PIRA's Global Oil, Natural Gas and Coal groups to evaluate the key assumptions underlying their outlooks and to develop plausible alternative assumptions and outcomes. Before joining PIRA in 2002, he was the Chief Economist of Exxon, where he was responsible for developing the company's long-range economic and energy outlook. Mark designed and managed the implementation of the energy modeling system and database that allowed ExxonMobil to develop its base-case global energy outlook as well as alternative cases to capture the impact of changes in price, economic growth, environmental policy and other critical assumptions. Prior to this position, Mark spent five years in Exxon's International Gas Marketing Company, where he developed the Asian gas supply/demand balance. During his 25 years at Exxon he also had assignments in Upstream Planning, Treasurers, and Corporate Planning functions. He holds a Ph.D. in economics from the University of Pennsylvania.
